3. The facts and matters I have stated in my "Response of John M. 4. In further support of his Reponse, Claimant avers as follows, with respect to the collection and submission of a sample of allegedly asbestos-containing material to his abatement contractor, ACM Services Corporation of Rockville, Maryland: That Claimant peeled/removed a portion of white, stucco-like, textured surfacing, affixed to wallboard/sheetrock in his dining room installed by a previous owner or occupant of his residence, from same and submitted it, with the paper-like surfacing material of the wallboard/sheetrock subsurface still attached, to the contractor, ACM Services Corporation of Rockville, for laboratory analysis of the presence of asbestos in February, 2000. Claimant subsequently received, from ACM Services Corporation, the analysis of Labcorp, i.e., Laboratory Corporation of America Holdings, of Richmond, Virginia, which is attached to his Response as a portion of Exhibit 1 to said Response, describing its analysis as "'100 [%] WHITE CHALKY W/ WHITE PAPER-LIKE, Asbestos found in white chalky only, Chrysotile >1-5%, Cellulose 20 %, Non-fibrous 75%."
